

Collaboration Opportunity: World Water Camp 2020 in Copenhagen, Denmark!

Dear Educational Institution,

World Water Camp 2020 is a week of unique educational experiences for a group of 50 students from around the world, aimed at bachelor or master students with interest in drinking water, wastewater and climate change adaption. The camp takes place October 18-23 2020, alongside and in collaboration with the 20th IWA World Water Congress & Exhibition, Copenhagen, Denmark.

World Water Camp 2020

Students attending the World Water Camp 2020 explore the 20th IWA World Water Congress & Exhibition in a unique way, through tasks and lectures arranged by a team of camp teachers, resulting in course credit. They will learn about the current worldwide challenges related to water and gain insight into a growing water sector that offers many exciting work opportunities for young water experts.

Collaboration

If the World Water Camp 2020 sounds interesting, we hope you will consider enrolling some of your students at the camp, and/or contribute to the professional content with your expertise. All collaborating institutions participating with 5 students or more will have their logo and name displayed at the World Water Camp 2020 website and camp merchandise, and be invited for the camp opening event on October 18, 2020 where IWA 2020 World Water Congress & Exhibition president Anders Bækgaard will welcome the course attendants.

For more information about the camp and registration of participants, visit our campsite <https://via.dk/watercamp>, or contact Julie Dam Larsen (judl@via.dk) for any questions.

First call for students to apply is until January 15, 2020!

Best Regards,

Anders Bækgaard
Congress President
