

ZADAĆA IZ INTEGRALA

1. Izračunajte integrale:

- | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| (a) $\int \frac{(\ln x)^2 + \ln(2x) + 1}{x} dx$
(c) $\int \sqrt{\frac{1-x}{x}} dx$
(e) $\int \frac{dx}{e^{2x} + 2e^{-2x} + 2}$
(g) $\int_0^{\frac{\pi}{4}} \frac{\sin^2 x e^{\tan x}}{\cos^4 x} dx$
(i) $\int_0^1 (x^3 + x)e^{x^2} dx$
(k) $\int_0^1 x^2 \operatorname{arctg} x dx$ | (b) $\int \frac{1}{\sqrt[3]{\arcsin x} \sqrt{1-x^2}} dx$
(d) $\int_0^1 \frac{dx}{x^4 + 3x^2 + 2}$
(f) $\int_{\frac{\pi}{4}}^{\frac{\pi}{3}} \frac{dx}{\cos x (\sin x + \cos x)}$
(h) $\int \frac{\sin x}{\cos^2 x - 5 \cos x + 6} dx$
(j) $\int_0^{\frac{\pi}{2}} e^{-\cos x} \sin(2x) dx$ |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

2. Ispitajte konvergenciju nepravog integrala:

- | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| (a) $\int_0^{\frac{1}{3}} \frac{dx}{x \sqrt[3]{\ln^4 x}}$
(c) $\int_1^{\infty} \frac{\operatorname{arctg} \frac{1}{x}}{(1+x)^2} dx$
(e) $\int_0^{\frac{\pi}{2}} \frac{\sin x dx}{\sqrt{1-\cos x}}$ | (b) $\int_{\frac{\pi}{6}}^{\frac{\pi}{2}} \frac{\operatorname{ctg} x}{\sqrt{1-\sin^3 x}} dx$
(d) $\int_0^{\infty} \frac{x dx}{x^4 + 1}$ |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|

- 3.** Odredite površinu lika omeđenog parabolom $y = x^2 - 2x - 3$ i pravcem $y = -2x$.
- 4.** Izračunajte površinu lika omeđenog krivuljama $y = \frac{2}{1+x^2}$ i $y = x^2$.
- 5.** Odredite volumen tijela koji nastaje rotacijom lika omeđenog krivuljom $y = x^4$ i pravcem $y = 1$ oko osi y .
- 6.** Odredite volumen **rotacijskog paraboloida** koji nastaje rotacijom lika omeđenog krivuljom $x = y^2$ i pravcem $x = a$, za $a > 0$ oko x -osi.
- 7.** Odredite volumen tijela koji nastaje vrtnjom lika omeđenog krivuljom $y = 1 - x^2$ i osi x
 - (a) oko osi x .
 - (b) oko osi y .
