Project Objectives

The EU-METALIC II project has set objectives which are in line with EMA2-Strand1 objectives which contribute to the mutual enrichment of third-countries and the EU, not only in academic matters, but also in political, educational, cultural and economic matters. These objectives are:

- To better adapt the Moroccan, Egyptian, Tunisian, Algerian and Libyan institutions to contribute to national development needs and to respond to globalisation challenges.
- To better integrate the Third-Country universities within the Euro-Mediterranean area.
- To contribute to the mutual enrichment of societies by developing the qualifications of the three target groups at all levels.
- To promote mobility both for students, researchers, academics and administrative staff from third countries especially from vulnerable groups, selected on the basis of academic excellence, to obtain qualifications and/or experience in the European Union;
- To raise the academic level and international visibility of the third-countries partners' Higher Education through joint degrees, co-tutorship of thesis, new programmes and exchange of academic staff. This will develop and strengthen the HE learning and teaching capacity of the Third-Country institutions.
