

Prof. Dr. Ing. **UNGUREANU Daniel-Viorel**

Daniel-Viorel Ungureanu is a Professor of Steel Structures in the Department of Steel Structures and Structural Mechanics, Faculty of Civil Engineering, at Politehnica University Timisoara. He is also a Senior Researcher at the Laboratory of Steel Structures of the Romanian Academy, Timisoara Branch. He teaches at both undergraduate and postgraduate levels and serves as a PhD supervisor.

Professor Ungureanu's main research area is in the field of structural engineering with particular expertise in steel structural members and systems, cold-formed steel structures, structural analysis and stability, numerical modelling, and sustainable constructions. He is the chairman of *TC14 for Sustainability and Eco-Efficiency of Steel Construction* and a member of the technical committees the *TC7 for Cold-formed thin-walled sheet steel in buildings* of the *European Convention for Constructional Steelwork* (ECCS). Viorel Ungureanu is also a corresponding member of the Technical Sciences Academy of Romania (ASTR).
